# Revitalize New Mexico

The Green Party of New Mexico seeks those who wish for a more democratic, freer, more equitable society. Greens choose to empower citizens rather than exert power over them. Greens engage in electoral politics and also are active year round initiating and supporting efforts to create a socially just, peaceful, prosperous and sustainable future based in strong self-reliant communities. Acting together, we can shape the future to provide a higher quality of life for all New Mexicans. Members can act through a county chapter in several counties (see reverse). New Mexico Greens are part of the national (47 states) and international (90 countries) Green Movement.

## Greens initiate actions and are key workers and supporters of actions in coalition with other organizations
