

Hon. NM State
Representative,

We are a group of citizens from your district who would like to see marijuana, both hemp and cannabis, legalized for commercial activity and responsible adult consumption. We believe marijuana is less physically addictive and less harmful than alcohol. As a Nation, we have come to the conclusion during the Prohibition Era, that the costs of banning alcohol were far greater than the costs of its legalization. We ask that you join us in our conclusion that laws criminalizing marijuana also cause more harm than good and should be repealed. Marijuana should be legalized, taxed and regulated by the State of NM. We believe marijuana's legalization will have the following benefits:

 Create jobs.

 Reduce the flow of money to organized crime.

 Reduce the burden on our court and prison systems.

Generate a revenue stream to state coffers.

Enhance human Liberty and Happiness.

We, your constituents, request that you develop legislation for the regulation of marijuana, and ask that you establish the appropriate tax

rates for personal
consumption and commercial
activity of cannabis and hemp.

Thank you,

Green Party of Santa Fe
Rick Fabrick, Co-Chair
